ACUERDOS TRANSFORMATIVOS CRUE-CSIC Y APLICACIÓN EN LA UEX

Durante el año 2021 Crue Universidades Españolas, y el CSIC, han suscrito acuerdos con las editoriales **American Chemistry Society, Elsevier, Springer Nature y Wiley** que permiten publicar en acceso abierto, sin coste para el autor.

Durante 2021, 71 artículos publicados por el investigadores de la Universidad de Extremadura se han acogido a estos acuerdos, lo que ha supuesto un importe de **147.578€** que no han tenido que detraer los investigadores de sus presupuestos de proyectos.

El número de esos trabajos que está en revistas de los primeros cuartiles es más que significativo, tal como se muestra en los gráficos incluidos más adelante.

Aportamos a continuación un análisis de los datos más relevantes.

Los Acuerdos Transformativos forman parte de los cambios que la Ciencia Abierta implica para el desarrollo de la investigación científica. En los últimos años el marco legal ha ido avanzando para que los resultados de las investigaciones se publiquen en acceso abierto (OA) y se han ofrecido recomendaciones para incluir el OA en las negociaciones con los editores.

De un modelo de suscripción se pasa a otro en el que las editoriales reciben un precio justo por sus servicios de edición en acceso abierto. Ya no se paga por leer artículos que se publican con restricciones de acceso sino por los servicios que dedican a publicar esos artículos en acceso abierto. Es lo que se conoce como **Read & Publish** (Leer & Publicar).

De esta forma, las universidades o sus bibliotecas pagan para que una institución tenga acceso a las revistas de una editorial y que el coste de suscripción también cubra parte de los gastos de procesamiento de los artículos (APC) que los autores de la institución pagarían normalmente por publicar su trabajo en acceso abierto.
